

1

START HERE

First 2 weeks of school: Activate LiftOff and have students take the Adaptive Diagnostic for each strand area. May be staggered into step 2.

STEP 2

Diagnostic results will provide a personalized learning plan in "My Galaxies". Students work until all skills are at grade level by earning a star for every topic.

STEP 3

Once students reach their grade level, it's time to move them to Education Galaxy to begin mastering on-grade level standards. Go back to program selection, activate Education Galaxy and deactivate LiftOff. Students then begin working in Education Galaxy.
