

Adaptive Intervention

RECOVER LEARNING LOSS

LiftOff is an adaptive intervention program that supports instruction by recovering learning loss that has occurred by finding the students learning level through a diagnostics assessment and then students can begin to work on their own individualized learning plan.

VERTICALLY ALIGNED TO YOUR STATE STANDARDS

Administrators and teachers can have confidence in the practice and assessments students complete with LiftOff. All of our diagnostics, assignment options, and questioning are aligned specifically to your state standards. We ensure all of our questions are built from the ground up to prepare students for their state assessments.

DATA DRIVEN PROGRESS MONITORING

Our dynamic reports make it easy for educators to accurately progress monitor and target specific instructional areas of focus to best differentiate and support learning loss that has occurred over time. LiftOff provides teachers and interventionists with a variety of reports to help them monitor their students' progress and assist in planning small group instruction.

BUILD STUDENT ENGAGEMENT

LiftOff builds student engagement through our exciting and fun Alien Ranking levels, avatars, rockets, and games! Students earn Galaxy Stars for their hard work and academic growth. These engaging rewards that students unlock through their mastery of standards are never a distraction during the learning process and encourage students to have fun while working hard.

PERSONALIZED ASSIGNMENTS AND ASSESSMENTS

LiftOff supports students to reinforce their state standards with a variety of personalized assignments and assessments. Teachers can create custom differentiated practice, assignments, and tests to specific students or multiple classes. Students can also receive practice in assignments through video assignments, writing compositions, constructed response, and SuperSheets.

VIRTUAL INTEGRATIONS

We support instruction in a variety of ways for virtual learning or hybrid instruction with our fantastic remote features for teachers and students in LiftOff. We support with communication and connection with some of our terrific remote features:

- Teacher Chat
- Family and Teacher App
- Alien Arena
- Alien Explanations
- Mini Video Lessons
- Video Messaging
- Google Classroom

NWEA MAP INTEGRATION

LiftOff also integrates with the NWEA MAP! Once students take their Beginning of the Year MAP assessment, you can import your students RIT scores into LiftOff.

Our LiftOff program will:

- Fine tune each student's skill gaps with a focused specific diagnostic assessment tailored to each student that is reduced and targeted
- Determine each student's level of proficiency within a set of vertically aligned topics and skills in math and reading

GOOGLE CLASSROOM INTEGRATION

LiftOff integrates with Google Classroom! Teachers will be able to link their class and LiftOff assignments to their Google Classroom. Students will see their LiftOff assignments in their Google Classroom, and teachers will be sent their results directly.

INTERVENTION FOR K-8

LiftOff supports elementary and middle school students (grades K-8). LiftOff will help determine which skills and state standards students are needing in math and reading. LiftOff will adapt to the level students need to reinforce key concepts and allow students to work at their own pace, while tracking their growth and areas of focus to be successful.
